MANISH KUMAR

Senior Automation Test Engineer / SDET

Frankfurt am Main, Germany | +49-15212955230 | manish1561988@gmail.com | linkedin.com/in/kumar05

SUMMARY

Automation Test Engineer with 16 years in software testing, including 8+ years of hands-on test automation experience (Selenium, Playwright, TestNG, REST API/Rest-Assured) with CI/CD pipeline integration, built across UK Government, US agri-finance, and German banking platforms. Designed a Selenium + Java + Cucumber BDD framework that automated 80% of regression test cases for a business-banking platform, cutting execution time from 14 hours to 4 hours and lifting release frequency 5x. Deep domain background in German banking/BFSI (ING Bank, ING-DiBa) spanning automation, API testing, and data-migration QA.

KEY SKILLS

Automation & Testing: Selenium WebDriver, Playwright (JavaScript), TestNG, JUnit, Rest Assured, Postman, Cucumber BDD, Page Object Model, Keyword-Driven Framework, Cross-Browser Testing, API Testing, Functional/Regression/Integration/E2E/Smoke/Sanity Testing

CI/CD & DevOps: Jenkins, GitHub Actions, Azure Pipelines, Docker, Docker Compose, Ansible, Terraform, Containerization

Languages: Java, JavaScript, Gherkin

Database: SQL (Oracle)

Cloud: AWS (EC2, IAM, S3)

Version Control: Git, GitHub

Project & Test Management: JIRA, Azure Boards, Confluence, Allure, Agile/Scrum, SDLC, STLC, Defect Life Cycle, RTM

Process & Leadership: Test Lead, Team Mentoring, Sprint Planning, Stakeholder Reporting, Release Management, Root Cause Analysis, Client Requirement Gathering, Training & Knowledge Transfer

CERTIFICATIONS

CP-SAT (Certified Professional – Selenium Automation Test) • CP-WST (Certified Professional – Web Service Testing) • CSM (Certified Scrum Master) • CP-DOF (Certified Professional – DevOps Foundation) • Certified DevOps Associate

PROFESSIONAL EXPERIENCE

Test Lead — HCL Technologies GmbH **Jun 2022 – Aug 2026**

Project: Business Banking, ING Bank (Germany) | Frankfurt, Germany

- Designed a Selenium WebDriver + Java + Cucumber BDD automation framework using Page Object Model with TestNG parallel execution across Chrome, Firefox, and Edge, reaching 80 of 100 regression test cases automated.
- Cut regression execution time from 14 hours to 4 hours (71% reduction) by automating the regression suite, freeing 3 QA engineers to move to exploratory and new-feature testing.
- Held zero missed regressions across 6 consecutive releases after the automation go-live.
- Integrated the automated regression suite into a Jenkins CI/CD pipeline triggered on every release-branch merge via GitHub webhooks, removing manual test triggering.
- Set up Allure Reports with pass/fail metrics, failure screenshots, and trend history, replacing 2 hours of manual Excel reporting with automated stakeholder distribution.
- Brought commit-to-production time down from 2-3 business days to 4-6 hours by pairing CI/CD automation with containerized test environments, moving the team from weekly to on-demand releases (5x release frequency).
- Containerized test environments with Docker and Ansible, removing about 2 hours of manual environment setup per release.
- Used Playwright, Postman, and Rest-Assured alongside Selenium for web-service and UI test coverage, tracked in JIRA and Azure Board.

Sr. Automation Engineer — AgFirst Farm Credit Bank (TCS, WFH) **Oct 2020 – Apr 2022**

- Wrote automation test scripts in TestComplete from manual test scenarios, covering positive and negative cases for a Loan System Replacement (LSR) platform built on Microsoft technologies.
- Built and maintained the regression test suite, updating the automation framework and functional data repositories across releases and enhancements.

- Logged and tracked defects in JIRA, coordinated daily with developers on resolution, and took part in scrum and sprint planning meetings.

Test Engineer — SME Business, ING Bank (TCS) **Jan 2020 – Aug 2020**

QA Engineer testing a new SME loan-processing platform, covering functional, integration, and end-to-end testing across REST services, a data warehouse, and account management systems.

- Wrote and executed test cases for web services covering functional, integration, and end-to-end testing on a new SME loan-processing platform.
- Performed backend testing with Oracle SQL queries to verify database integrity and data accuracy across the platform.
- Logged and tracked defects in JIRA, coordinating daily with developers on resolution and sharing test reports with the project manager.
- Proposed automating the regression suite using Rest-Assured and Selenium, scoping the approach for the team.

Tester — OWB-to-DataStage ETL Migration, ING-DiBa (TCS) **Jul 2017 – Dec 2019**

Specialized QA tester focused on ETL and DataStage migration testing for a large-scale banking data project, ensuring data accuracy, completeness, and integrity across complex data pipelines and database tables.

- Tested and validated ETL jobs migrated from Oracle Warehouse Builder (OWB) to IBM DataStage, verifying correct data extraction, transformation, and loading across source and target systems.
- Performed database testing by writing and executing SQL queries to validate data population, data completeness, and business rule compliance in target tables.
- Conducted thorough data reconciliation between source and destination to identify data mismatches, duplicates, and missing records.
- Scheduled and validated daily automated job runs using the Automic UC4 scheduling tool as part of the migration testing cycle.
- Tracked, reported, and managed defects throughout the testing lifecycle using JIRA, ensuring timely resolution and clear communication with development teams.

Test Automation Engineer — DBS, Home Office (UK Government, TCS) **Feb 2016 – Jun 2017**

Built and delivered UI test automation for the DBS (Disclosure and Barring Service) online barring-referral portal, a UK Government platform, from offshore.

- Designed a Selenium WebDriver (Java) automation framework using Page Object Model for the DBS online referral portal, covering login and referral-submission workflows.
- Automated end-to-end referral-submission scenarios — login, applicant detail capture, referral type selection, save-and-continue — using TestNG.
- Configured browser and environment selection through property-file-driven setup, enabling execution across Chrome, Firefox, and Internet Explorer.
- Logged and tracked defects in JIRA, coordinating with the UK-based development team on resolution.

Magic Software Pvt. Ltd. **Aug 2010 – Feb 2016**

- Executed comprehensive Functional, Regression, and Smoke/Sanity testing across multiple web applications, ensuring product stability at every release cycle.
- Design and Maintained detailed test cases, test plans, and defect reports using JIRA and excel sheet.
- Built strong domain knowledge that directly informed automation priorities and test coverage strategy.
- Contributed in UI automation framework using selenium WebDriver with java, significantly reducing manual regression test.
- Leveraged manual testing expertise to identify the highest-value candidates for automation coverage.
- Structured and executed test suites using TestNG/JUnit with clear reporting and assertions

EDUCATION

MCA — Sikkim Manipal University (Tulsi Academy of Higher Education), 2015

GNIIT (Software Engineering) — NIIT Ghaziabad

B. Com — CCS University Meerut (SSV PG College Hapur), 2006
